

Isoenzyme analyses have shown that the RuGli glioblastoma cells are of rodent and not of human origin. The studies reported in Goodman et al. 1987. *J. Cell Biol.* 105:589–598, as well as in Gehlsen et al. 1988. *Science (Wash. DC)* 241:1228–1229, Dillner et al. 1988. *Exp. Cell Res.* 177:186–198, and Gehlsen et al. 1988. *J. Cell Biol.* 106:925–930 should be considered in this light.
