

Marks and Maxfield. Vol. 110, No. 1, January 1990

Due to a printer's error, the last two lines of text on page 43 were dropped. The correct sentence is as follows: "The increased $[Ca^{2+}]_i$ could be involved in mediating migration either as a messenger, functioning in the signal transduction process, or by directly affecting Ca^{2+} -sensitive components of the cytoskeleton (Stossel et al., 1985)."
