

Brennan et al. Vol. 110, Pt. 4, April 1989. pp. 929–937.

Due to an author's error, the last sentence of the paragraph headed "The MyoD1 Gene Cannot Be Activated . . ." (page 932) was incorrect. The sentence should read:

"We also used a probe from the portion of the 3' untranslated region of MyoD1 that is absent from the transfected cDNA to confirm that the smaller transcript indeed arises from the exogenous gene."
