

CORRECTION *The Journal of Cell Biology*

---

Stochaj and Silver Vol. 117, No. 3, May 1992. Pages 473-482.

Due to an author's error, the following sentence on page 479 should read:

"Yeast cells missing Nsr1 are still viable (Lee et al., 1991) and show no detectable abnormalities in the localization of some nuclear proteins (M. Bossie, unpublished results)."

On page 481 please note the following addition:

"We gratefully acknowledge Dr. T. Mélèse for providing the *Δnsr1* strain."
