

Alan W. Dove

Vol. 160, No. 6, March 17, 2003. Page 802.

The paper to which the above-referenced “In This Issue” news story refers has been retracted. We thus retract the In This Issue story as well. The authors retracted the paper by Liu et al. (*JCB* 160:899) on the basis of the fact that one of the major conclusions, regarding the function of paramyosin in myoblast fusion, is incorrect. The authors stand by all of the other data with the exception of this correction. For details, see the full text of the retraction on page 783 of this issue.
