Vol. 173 No. 2, April 24, 2006. Pages 265–277.

The following errors occur in this paper.

All instances of “JIP” alone should read “JNK-interacting protein”, whereas “JIP1” refers specifically to the JIP family protein also known as MAPK8IP1.

The legend for Fig. 9 B should read as follows: “(B) Total neurite length refers to the combined length of processes from a given cell. Means \pm SEM from 4–8 experimental sets are shown (*, $P < 0.02$; **, $P < 0.001$; determined by t test).”
