

A role for Rab5 in structuring the endoplasmic reticulum

Anjon Audhya, Arshad Desai, and Karen Oegema

Vol. 178 No. 1, July 2, 2007. Pages 43–56.

We mistakenly referred to the human homologue of the *Caenorhabditis elegans* protein YOP-1 as DP1/NogoA. NogoA is another name for Rtn4a, which functions redundantly with DP1 in ER restructuring. The human homologue of YOP-1 is DP1.
