

**Heparanase deglycanation of syndecan-1 is required for binding of the epithelial-restricted prosecretory mitogen lacritin**

Peisong Ma, Shannon L. Beck, Ronald W. Raab, Robert L. McKown, George L. Coffman, Atsushi Utani, William J. Chirico, Alan C. Rapraeger, and Gordon W. Laurie

Vol. 174 No. 7, September 18, 2006. Pages 1097–1106.

The authors have noted an error in the legend to Fig. 7. The corrected sentence appears below.

[D] Comparative incubation of lacritin-intein beads with human SDC1 del 51–252 or 1–51 lysates, or del 51–310 conditioned media, from stably or transiently expressing HEK293T cells.
