

Aurora A is involved in central spindle assembly through phosphorylation of Ser 19 in P150Glued

David Reboutier, Marie-Bérengère Troadec, Jean-Yves Cremet, Lucie Chauvin, Vincent Guen, Patrick Salaun, and Claude Prigent

Vol. 201 No. 1, April 1, 2013. Pages 65–79.

In the Results section of this paper, the position of two sequences was inverted. The corrected sentence appears below.

Silent mutations were then introduced into the *wt-AurA* and *as-AurA* constructs to make them resistant to the RNAi used to deplete endogenous Aurora A: the sequence 5'-CCTGTCTTACTGT-3', between positions 729 and 741, was replaced with 5'-ACTATCATATTGC-3'.

The html and pdf versions of this article have been corrected. The error remains only in the print version.
