

CORRECTION *The Journal of Cell Biology*

Besterman et al., Vol. 91, No. 3, Pt. 1, December 1981
 Page 722, Table IV should read:

TABLE IV
Characteristics of Intracellular Compartments and Associated Fluxes Involved in Fluid-phase Pinocytosis

	Macrophages		Fibroblasts	
	Compartment 1	Compartment 2	Compartment 1	Compartment 2
Half-life, min	5	180	6-8	430-620
Size, cpm/10 ⁶ cells	1,110	19,980	1,650	30,000
<i>k</i> _{efflux} to medium, %/min	13.9	0.4	8.7-11.5	0.11-0.16
<i>K</i> _{efflux} to medium, cpm/min·10 ⁶ cells	154	80	144-190	35-51
Total <i>K</i> _{efflux} = total <i>K</i> _{influx} , cpm/min·10 ⁶ cells	234		179-241	

Values were determined as described in text using data from Figs. 1A and 3 for macrophages and from Fig. 1B and data analogous to those in Fig. 3 for fibroblasts.
