

CORRECTION *The Journal of Cell Biology*

Goodenough and Heuser, Vol. 95, No. 3, December 1982

Page 805, Fig. 15 should have appeared as follows:

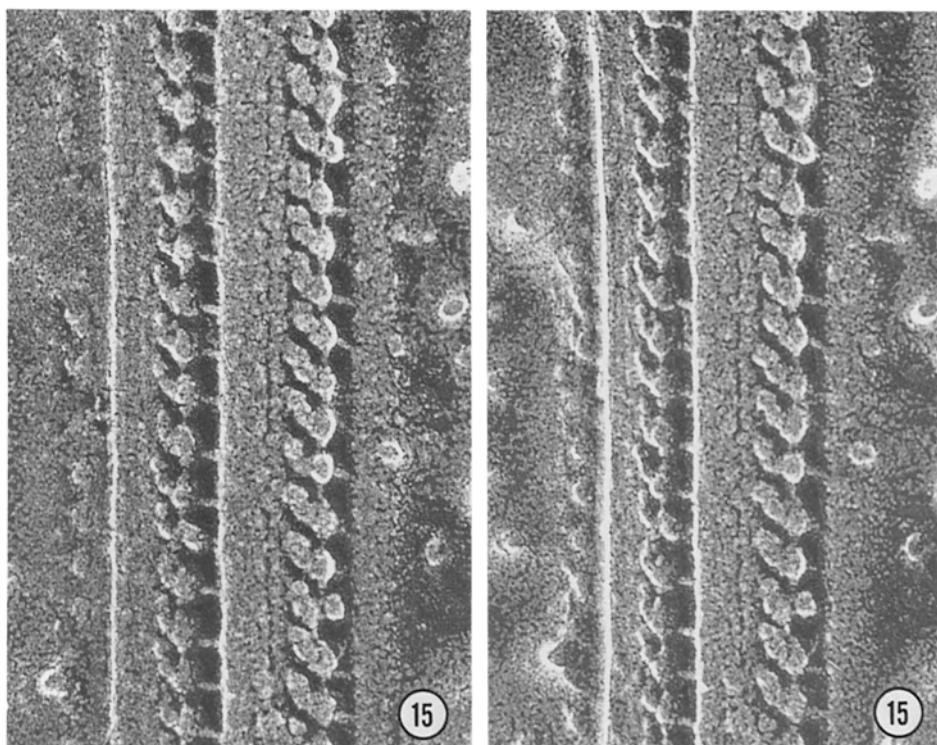

FIGURE 15 Relaxed *Tetrahymena* axoneme, unfixed, incubated in 0.1 mM vanadate and then 0.5 mM ATP. Stereo pair. P-foot detachment from the A microtubule is shown to advantage, as are the head-to-head linkers in both rows. Some stalks tilt more basally than others.  $\times 270,000$ .
