

CORRECTION *The Journal of Experimental Medicine*

Vol. 142, No. 2, August 1975.

In J. K. Christman, S. C. Silverstein, and G. Acs. Immunological analysis of plasminogen activators from normal and transformed hamster cells. Evidence that the plasminogen activators produced by SV40 virus-transformed hamster embryo cells and normal hamster lung cells are antigenically identical.

Page 431. The material set in italics below has been omitted from the second paragraph in the Discussion section:

These data are consistent with the findings of Kucinski et al. (3) and Aoki and von Kaulla (20). They found that antibodies to human urokinase were specific for the *plasminogen activator made by human kidney cells and did not cross-react* with plasminogen activators from other human tissues.
