M. E. MacDonald, T. W. Mak, and A. Bernstein. Erythroleukemia induction by replication-competent type C viruses cloned from the anemia- and polycythemia-inducing isolates of Friend leukemia virus. 151:1493, No. 6, June 1980.

Page 1496, legend to Fig. 1. The legend to Fig. 1 should read: Spleen touch preparations from BALB/c mice injected as newborns with F-MuLV_A and F-MuLV_P. BALB/c mice were injected intraperitoneally at 1 d of age with (A) 0.1 ml of filtered culture fluid from uninfected NIH/3T3 fibroblast cells, (B) 5×10^5 PFU of F-MuLV_A, or (C) 5×10^5 PFU of F-MuLV_P. Spleens were taken 45 d after incubation for the preparation of touch prints.
