

In the article "A selective defect of interferon α production in human immunodeficiency virus-infected monocytes" by H.E. Gendelman, R.M. Friedman, S. Joe, L.M. Baca, J.A. Turpin, G. Dveksler, M.S. Meltzer, and C. Dieffenbach (November 1990, 172:1433), there were errors in the nucleotide primer and probe sequences presented in Table 1. The correct sequences of nucleotides used in the experiments appear below.

| | | |
|---------------|------------------|--------------------------|
| IL-6 | sense primer | 5'-GTGTGAAAGCAGCAAAGAGGC |
| IFN- α | antisense primer | 5'-ATTCTGCTCTGACAACCTCCC |
| IFN- ω | sense primer | 5'-AACATGACCCTCCTAGACCA |
| GAPDH | sense primer | 5'-CCATGGAGAAGGCTGGGG |
| GAPDH | probe | 5'-CTAAGCAGTTGGTGGTGCA |
