

In the article "OX-22<sup>high</sup> CD4<sup>+</sup> T cells induce wasting disease with multiple organ pathology: prevention by the OX-22<sup>low</sup> subset" by Fiona Powrie and Don Mason (December 1990, 172:1701), it was stated that the monoclonal antibody MRC OX-22 reacts with rat CD45RB. Recent work from the MRC Cellular Immunology Unit has shown conclusively that this antibody recognizes rat CD45RC. Data demonstrating this point will be published in due course.
