

In the article "Regions of the T cell receptor  $\alpha$  and  $\beta$  chains that are responsible for interactions with CD3" by L. Tan, J. Turner, and A. Weiss (May 1991, 173:1247), an error appears in the CD8/Ti  $\alpha$  sequence in Fig. 1 A. The sequence as published is missing two amino acids that should precede the glutamine in the Ti  $\alpha$  part of the sequence. The correct sequence is:

1 4 3   1 4 4   /   2 3 9   2 4 0   2 4 1   2 4 2   2 4 3  
CD 8   C y s   A r g   /   S e r   P h e   G l u   T h r   A s p   T i  $\alpha$

The error does not influence the findings in the article nor the interpretation of the findings. However, the authors can not be certain that the experiment would be reproducible by others based on the sequence published.
