

In two papers, published in the November issue, "Human T cell lymphotropic virus type I and cutaneous T cell leukemia/lymphoma," [180:1581-1585], and "Persistence of human T cell lymphotropic virus type 1 (HTLV-1) sequences in peripheral blood mononuclear cells from patients with mycosis fungoides," [180:1973-1978], a reference appeared incorrectly. It should have appeared as follows:

Srivastava, B.I.S., K. Banki, and A. Perl. 1992. Human T-cell leukemia virus type I or a related retrovirus in patients with mycosis fungoides/Sézary syndrome and Kaposi's sarcoma. *Cancer Res.* 52:4391-4395.
