

In Fig. 1 of Lacerda et al. (March 1996, 183:1215–1228), the histology panel depicted as *b* is, in fact, *c* (i.e., Ig k L chain stain), while that shown as *c* is, in fact, *b* (i.e., CD20 stain). With this correction, both the figure legend as well as the text are correct.
