

The nuclear receptor PPAR γ selectively inhibits Th17 differentiation in a T cell–intrinsic fashion and suppresses CNS autoimmunity

Luisa Klotz, Sven Burgdorf, Indra Dani, Kaoru Saijo, Juliane Flossdorf, Stephanie Huckle, Judith Alferink, Nina Novak, Marc Beyer, Gunter Mayer, Birgit Langhans, Thomas Klockgether, Ari Waisman, Gerard Eberl, Joachim Schultze, Michael Famulok, Waldemar Kolanus, Christopher Glass, Christian Kurts, and Percy A. Knolle

Vol. 206, No. 10, September 28, 2009. Pages 2079–2089.

The authors regret that Nina Nowak's name was incorrectly listed as Natalja Nowak in the original version of their paper. The final html and pdf versions of the article have been corrected.
