

EXPRESSION OF CONCERN

Expression of Concern: In vivo NCL targeting affects breast cancer aggressiveness through miRNA regulation

Based on an investigation by the College of Medicine Investigation Committee (the COMIC) at The Ohio State University, and JEM's review, JEM is issuing this Expression of Concern regarding Figures 1 E and 1 F from Pichiorri et al. (2013) *J. Exp. Med.* 210(5):951–68 and Correction Pichiorri et al. (2017) *J. Exp. Med.* 214(5):1557.

Vol. 210, No. 5 | <https://doi.org/10.1084/jem.20120950> | April 22, 2013

Vol. 214, No. 5 | <https://doi.org/10.1084/jem.2012095001172017c> | January 19, 2017

Flavia Pichiorri, Dario Palmieri, Luciana De Luca, Jessica Consiglio, Jia You, Alberto Rocci, Tiffany Talabere, Claudia Piovan, Alessandro Lagana, Luciano Cascione, Jingwen Guan, Pierluigi Gasparini, Veronica Balatti, Gerard Nuovo, Vincenzo Coppola, Craig C. Hofmeister, Guido Marcucci, John C. Byrd, Stefano Volinia, Charles L. Shapiro, Michael A. Freitas, and Carlo M. Croce. 2013. *J. Exp. Med.* In vivo NCL targeting affects breast cancer aggressiveness through miRNA regulation. 210:951–968. <https://doi.org/10.1084/jem.20120950>
