

Nakayama, S., and A.F. Brading.

*The Journal of General Physiology*. Volume 106, No. 6, December 1995.

Pages 1211–1224.

On page 1213, the sentence beginning on line 39 should read as follows:

Since we are mainly interested in slower tail currents than those normally seen after simple depolarizations, we set the digital resolution of the sampling to between 500  $\mu$ s and 2 ms.

On page 1220, line 23 should read as follows:

This tail current had a decay time constant of 3–5 ms.
