### Correction: Sniffing out $\text{Ca}^{2+}$ signaling in olfactory cilia

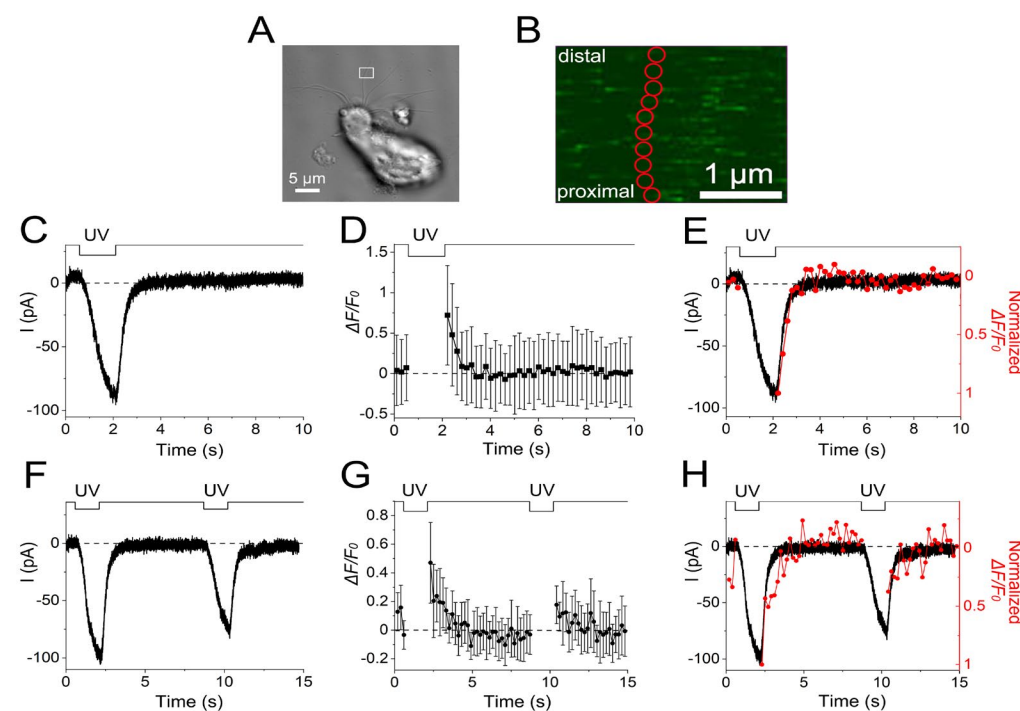

Ben Short

Vol. 155, No. 4 | <https://doi.org/10.1085/jgp.202313378> | March 22, 2023

Takeuchi and Kurahashi determined that the data presented in Fig. 6, D and G, is better presented as original data values in order to allow an accurate assessment of the experimental situation. Additionally, the label “Normalized” was added to panels E and H to clarify that the data presented is superimposed on the current waveform. These corrections do not affect the conclusions of this paper. The corrected version of the figure appears here.

The Research News commentary about this article used the image from Fig. 6 H. The image in this commentary has also been updated.
