CORRECTION

In Vol. 35, No. 6, July 20, 1952, page 896, in the diagram of the carrier system, the dotted line separating the "Outside" from the "Cell surface," was omitted by mistake by the printer.

The diagram, as it should appear, is printed below:

Outside	Cell surface	Inside
P +	$ \begin{array}{cccc} k_1 & & k_8 \\ A & \rightleftharpoons & A-P & \rightleftharpoons & A \\ k_2 & & & k_4 \end{array} $	+ P
Concentration of $P = C_*$	Amount of complex, A-P, = A . Total amount of carrier = A Amount of free carrier = $A-A$.	Amount of P = S Concentration of $P = S/V$
